

PROFESSIONAL GRADE **Shovels**

PROFESSIONAL GRADE SHOVELS

PC 6780

Dottie's Professional Grade Shovels are a unique compound construction fabricated out of fiberglass strands cured under tension in a thermosetting resin and wrapped in polypropylene. The hollow fiberglass core adds strength and rigidity maximizing performance and minimizing weight. The compression bar fills the throat of the blade reinforcing the highest point of stress. Our new cushion grip handle is designed to fit comfortably in the palm of the user's hand which enables them to effortlessly sling material away from the hole providing better control and leverage with reduced effort. The innovative handle construction is resistant to industrial chemicals, moisture absorption, as well as being easy to handle in extreme temperatures which makes our handle far superior to others.

CAT. NO.	UPC	DESCRIPTION	HANDLE LENGTH	STD	MSTR	WT/STD
SHR	24000	#2 Round Point	48" Handle	1	5	6.00#
SHS	24005	#2 Square Point	48" Handle	1	5	6.40#
