

PURPLE PVC PRIMER

Learn more

This purple primer uses an ultra low VOC, fast acting, non bodied formula that quickly softens and dissolves the joining surfaces of PVC pipe and fittings, preparing them for solvent cement application. It promotes maximum fusion between pipe and fitting by penetrating and softening surfaces faster than cement alone, helping create strong, well fused joints when used with the appropriate solvent cement. It's compatible with all classes and schedules of PVC, making it a dependable first step for a wide range of piping and conduit installations. It's also NSF certified for potable water, drain-waste-vent, and storm water use, and meets ASTM F656 and Uniform Plumbing Code.

Features and Benefits

- Fast acting formula
- Thin solvent
- Ultra low VOC for reduced fumes
- Purple color for easy identification
- Universal compatibility

Part#	UPC	Description	Size (oz)	Standard	Master
PR16	30975	Purple PVC Primer (Pint)	16	1	12
