

# REGISTER METAL PIERCING SCREW

Register Screws are manufactured with sharp points for secure fastening of HVAC vents and registers to walls. The white-painted head matches the grills finish, delivering a clean, flush fit for a sleek, professional appearance. They are commonly used for sheet metal applications, HVAC work, and plumbing.

## Features and Benefits

- Ultra-sharp piercing point
- Double-lead speed thread
- White head for clean finish
- Non-walking tip
- Commonly used for sheet metal applications
- Zinc-plated finish
