

Dual Rod Hangers

Dual rod hangers are single-piece anchors with heads threaded on both ends and sides, allowing installation in both vertical and horizontal orientations for threaded rod systems, eye bolts, and more. They are suitable for use in metal and wood.

Features & Benefits

- Vertical and horizontal applications in one anchor
- Sturdy, single-piece anchor crafted through cold forming and machining
- Smooth and fast overhead installation
- Zinc plated carbon steel

Suitable Base Materials

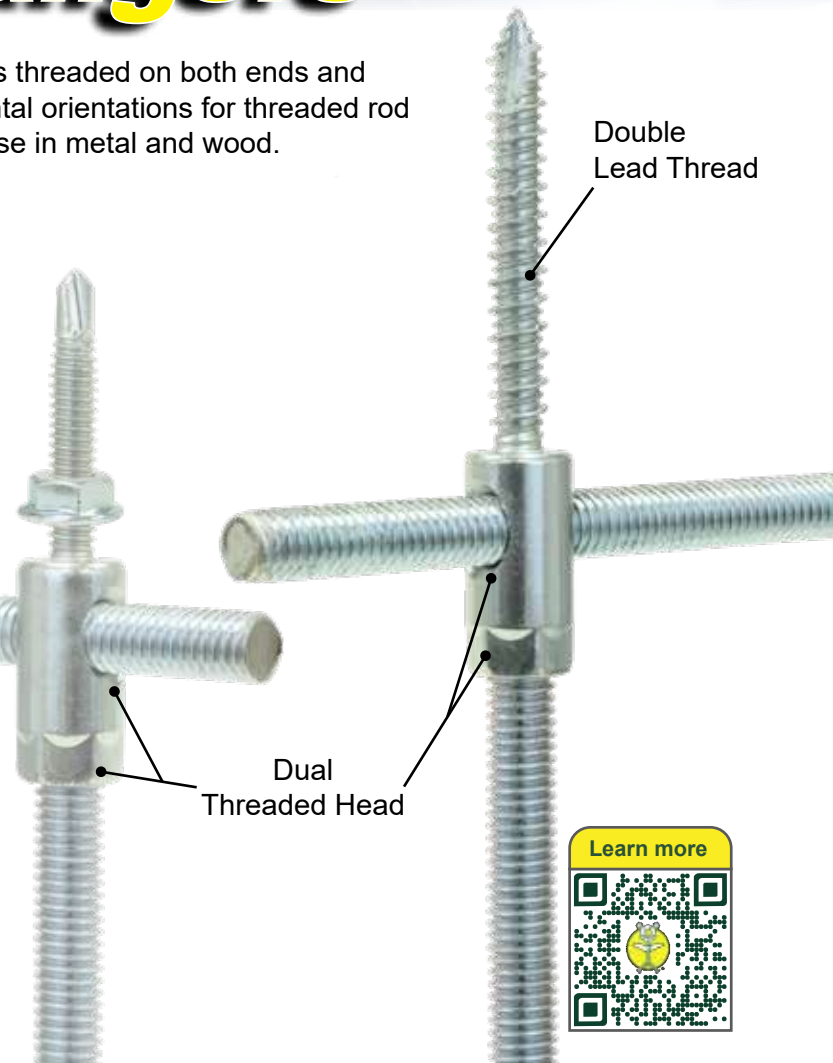

Steel purlins, beams, and bar joists

Wood and timber

Installation tool required: DUNIB
