

UNDERGROUND TAPE

Underground Tape is used to easily identify buried utility lines, pipes, cables and conduits. It is a 4 mil, non-adhesive, polyethylene tape with a printed continuous warning that is resistant to alkalis, acids, and other soil components. For proper installation, underground tape should be installed 9"-18" below ground level and 12" directly above buried pipes, utility lines, cables and conduits before final backfilling. Meets APWA color code.

APWA Uniform Color Code	
	Electric Power Lines, Cables, Conduit and Lighting Cables
	Communication, Alarm/Signal Lines, Cables or Conduits
	Gas, Oil, Steam, Petroleum, or Gaseous Materials

Features and Benefits

- Continuous warning
- Pliable in cold climates
- Unleaded pigment and ink
- APWA Color Code
