216 RED	219 GREEN

# I. GENERAL DESCRIPTION

**Features:** A unique, temporary, water-based marking chalk. This product is safe for use at all construction, utility, and survey sites. Aervoe Water-Based Marking Chalk is packaged to operate upside down by hand or in an Aervoe Spot Marker #1244, or Marking Stick #1245 applicator, with or without the cap on.

**Benefits:** This product is a true water-based formula, not "water added" for cost reduction formula. Adhesion is provided by non-resin binders and low pigment solids in a slurry that holds the chalk together as the mark dries. It is a fast-drying chalk designed for **temporary** marking. The mark will naturally disappear with water, traffic, or other abrasions.

**Uses:** Aervoe Marking Chalk is designed to temporarily mark most paved surfaces, soil, and grass. Use for utility marking, construction sites, surveying, landscaping, and athletic field marking. For golf course marking, use Aervoe Water-Based Marking Paint. For aisle striping in warehouses, parking lots, or traffic lines, use Aervoe Striping Paint. **Application:** For **aerosol** application, shake can for 1 to 2 minutes after rattle of the agitator ball is heard. Remove safety tab, invert can, and apply 3 to 4 inches from the surface for writing symbols and numbers. Apply 5 to 8 inches from the surface for 3/4" line or continuous direction tracks. Product will appear transparent when first applied; full opacity is achieved in 3 to 5 minutes. Keep can in motion during use to prevent puddling due to high delivery paint stream. For best results, use at temperatures between 50° and 80°F (10° and 27°C). If cap has been removed, replace it for storage and color identification. Clear spray tip after each use by turning can upright and spraying for 2 to 3 seconds.

**Limitations:** Please refer to the Safety Data Sheets for specific information on material hazards, etc. This aerosol product is designed to spray **upside down** or at an angle not greater than 30° from vertical. Please check your local air quality standards before using any bulk paint. Use caution if surface is wet, or if rain is imminent within 4 hours of application. Do not apply additional product until the previous coat is dry. On fresh asphalt or other porous surfaces, removal may be hampered due to solvent/pigment penetration.

Packaging: Aerosol:

Cans (20 oz.) Case - 12 cans/case 15 oz. net wt. (425 g) 16 lbs. (7.3k g)
